NEW at Pardoe's

Mushroom Compost

Mushroom Compost is the result of a rich growth medium for mushrooms. It is made from agricultural materials, such as hay, straw, straw horse bedding, poultry litter, cottonseed meal, cocoa shells and gypsum. Sphagnum peat moss adds to the organic nature of the substrate, providing a consistent, formulated and homogeneous product.

Mushroom Compost is steam treated to eliminate any pests, pathogens and weed seeds resulting in a superior fertilizer product.

Mushroom Compost is perfect for new lawns and is great for renewing older lawns. And, when used as a soil amendment in planting flowers, shrubs and trees, no other fertilizer is needed in the first year.

Top 10 Reasons to Use Mushroom Compost in Landscaping & Lawn Care

1. Suppresses sporulation of the artillery fungus in landscape mulch.
2. Decrease or eliminate the cost of liming by using a low cost, consistently high quality organic fertilizer of Mushroom Compost.
3. Restore soil structure by improving soil quality, nutrient content and beneficial soil microbe population and activity.
4. Improve water retention during drought conditions and in poor soils.
5. Mushroom Compost's organic nutrient values are verifiable consistent and available year round.
6. It is sustainable agriculture and a good environmental stewardship practice, providing a nutrient rich soil amendment in a complete ecological recycling process.
7. Addition of compost reverses soil organic matter depletion, providing improved turfgrass and plant production.
8. Composting stabilizes nitrogen and reduces nitrate leaching.
9. Improved water infiltration in clay soils.
10. Mushroom Compost is a Pennsylvania Department of Agriculture (PDA) accepted fertilizer and PA Preferred product.
